Re: Skandinaviska Enskilda Banken AB (publ)—File No. 82-3637

Ladies and Gentlemen:

The enclosed information is being furnished to the Securities and Exchange Commission (the "SEC") by Skandinaviska Enskilda Banken (the "Bank") pursuant to the exemption from the Securities Exchange Act of 1934 (the "Act") afforded by Rule 12g3-2(b) thereunder.

This information is being furnished under paragraph (1) of Rule 12g3-2(b) with the understanding that such information and documents will not be deemed "filed" with the SEC or otherwise subject to the liabilities of Section 18 of the Act and that neither this letter nor the furnishing of such information and documents shall constitute an admission for any purpose that the Bank is subject to the Act.

Very truly yours,

For and on behalf of
Skandinaviska Enskilda Banken

Additional Information Jan-March 2004

PRESS RELEASE

STOCKHOLM 6 MAY 2004

Appendix 1 SEB Trygg Liv

SEB Trygg Liv represents the SEB Group's life insurance business according to a bank-assurance concept, i.e. an integrated banking and insurance business. The purpose of the concept is to offer SEB's customers a complete range of products and services within the financial area. Savings in life insurance products, including pension savings, represent a growing share of the Swedish households' financial assets. Since 1995 the share has increased from 24 to more than 40 per cent.

Improved market position

SEB Trygg Liv offers both unit-linked and traditional insurance. Sales focus is, however, on unit-linked, which represents 91 per cent (81) of total sales. As of 31 December* 2003 SEB Trygg Liv was the market leader on the unit-linked market with a share of 24.2 per cent (24.7 at year-end 2002) of assets under management. As of 31 March 2004 the share of weighted** new business rolling 12 months was 31.8 per cent (21.1 in the same period of 2002/2003).

SEB Trygg Liv has a strong position in the private market within unit linked endowment insurance. The market share, weighted** new business rolling 12 months, was 31.8 per cent (22.2 in the same period of 2002/2003). Sales of endowment insurance is highly correlated to the development on the stock markets and was negatively affected by the earlier downward stock market trend. However, the positive stock market development has led to a certain recovery. Sales of private pension savings are relatively stable and SEB's sales in this area consist mainly of the product IPS, Individual Pension Savings. SEB is one of the leading suppliers within non-insurance-related pension savings, with a market share of

15.5 per cent as of 31 December*, based on payments during 2003.

Growing occupational pension business

In the corporate market, which constitutes more than 75 per cent of the total market, SEB Trygg Liv's market share within fund-related occupational pension is 31.0 per cent (20.8 in the same period of 2002/2003) of weighted new business rolling 12 months as of 31 March 2004. SEB Trygg Liv's ambition is to further develop the occupational pension business, partly through deeper co-operation with the organisation of medium-sized and large corporations within the Bank, partly through continued co-operation with independent life insurance brokers, who account for more than 65 per cent of occupational pension sales. SEB Trygg Liv was in 2002 and 2003 ranked number one among independent insurance brokers for offering the best service. The occupational pension market is less dependent on the general business cycle compared to the market of endowment insurance.

One effect of the growing occupational pension business is an increase in sales of regular premium policies compared to single premium policies. As of 31 March regular premiums represented 88 per cent of sales. This increases the future value of sales but at the expense of increased distribution costs, which in a short-term perspective has a negative impact on the operating result.

* The market share statistics for the first quarter of 2004 is not available for this item at publishing date of this report

** Single premiums plus regular premiums times ten.

Sales volume insurance (weighted**)

Increased new business profit

One way to analyse the result of sales efforts is to determine the sales margin for new business. The sales result, i.e. present value of new sales less actual selling expenses, is related to the weighted sales volume. The margin may fluctuate significantly in the short term. The new business margin during the period improved to 22.2 per cent due to improved

volume/cost relation. See Calculation of surplus value and changes in surplus value, and Surplus value accounting "Actual outcome compared to assumptions".

SEK M	Jan-Mar 2004	Full year 2003	Full year 2002	Full year 2001
Sales volume weighted (regular+single/10)	834	2 765	2 391	2 865
Present value of new sales (9% discount rate)	435	1 409	1 181	1 347
Selling expenses	-250	-909	-801	-1 029
Profit - new business	185	500	380	318
Sales margin - new business	22.2%	18.1%	15.9%	11.1%

Result

When analysing a life insurance company's result and profitability it must be taken into consideration that an insurance policy often has a long duration. That leads to an imbalance between income and costs at the time when a policy is signed. Income accrues regularly throughout the duration of the policy. Costs, on the other hand, mainly arise at the point of sale.

Income mainly consists of unit-linked fees (usually 0.65 per cent of assets under management plus SEK 250 per policy and year), fund management fees (varying depending on the chosen type of fund) and net interest. Compensation for administration agreements with the mutual entities is also included. Of importance for the income is thus the development of assets under management (i.e. net flow of premiums paid and change in the asset value) and to a smaller extent the sales of the specific period. The value of sales has to be evaluated on a more long-term basis.

Costs, on the other hand, are highly affected by sales in the current period when most of the sales costs are incurred. This has a negative impact on the operating result and makes it difficult to get a correct picture of the company's

profitability over time, especially in periods of strong sales growth. Particularly sales of corporate pension plans with long duration lead to an initial imbalance between income and costs as commission paid at point of sale is partly based on the total value of the policy. To some extent this is taken care of through capitalisation of acquisition costs which are depreciated over time.

In order to provide a more true presentation of the life insurance business, the total result is presented including the current period change in surplus values, being the present value of future profits from existing insurance contracts. SEB Trygg Liv uses the method of surplus value calculations since 1997 for both internal management accounting and external reporting.

The result of SEB Trygg Liv does not include the result of Gamla Livförsäkringsaktiebolaget SEB Trygg Liv and Nya Livförsäkringsaktiebolaget SEB Trygg Liv. These two mutual entities are not consolidated with the SEB Trygg Liv Holding group, which however receives a fee for administrative and sales services provided.

¹⁾ Changes in assumptions, see headline below – Calculation of surplus values and changes in surplus values.

²⁾ Operating expenses as percentage of premiums paid.

³⁾ Result ongoing business in relation to allocated capital, annual basis.

Calculation of surplus value and changes in surplus value

The surplus value calculation is based on different assumptions, to be adjusted when needed to correspond to long-term development.

Discount rate	9%
Surrender of endowment insurance contracts	5%
Lapse rate of regular premiums, unit-linked	10%
Growth in fund units	6%
Inflation	2%
Right to transfer policy (excl occupational pension)	1%
	According to industry experience
Mortality	

Changes in assumptions were made during the fourth quarter 2002 concerning lapse rate of regular premiums: from 8 to 10 per cent. During the second quarter 2003 the right to transfer policies in private pension insurance, unit-linked, was taken into consideration (1 per cent).

Sensitivity analysis

The calculation of surplus value is relatively sensitive to changes in assumptions. A change of the discount rate by +1/-1 percentage point gives an effect of SEK -786/+784m.

A higher or lower return/growth in fund units will result in positive or negative effects when the surplus value change of the period is calculated. A change in the growth assumption by +1/-1 percentage point will give a change in surplus value of SEK +797/-684m.

Surplus value accounting

Balance (after deduction of capitalised acquisition costs)						
SEK M	Q1 2004	Q4 2003	Q3 2003	Q2 2003	Q1 2003	Q4 2002
Opening balance ⁵⁾	5 211	4 661	3 771	3 176	3 270	3 110
Present value of new sales ¹⁾	435	419	351	362	277	288
Return on existing policies	179	116	117	118	123	134
Realised surplus value in existing policies	-175	-122	-121	-120	-121	-170
Actual outcome compared to assumptions ²⁾	-17	102	519	-77	18	-21
Change in surplus values from ongoing business, gross	422	515	866	283	297	231

Financial effects due to short term market fluctuations ⁴⁾	226	121	72	441	-338	411
Total change in surplus values	565	550	890	595	-94	160
Closing balance ⁵⁾	5 776	5 211	4 661	3 771	3 176	3 270

¹⁾ Sales defined as new contracts and extra premiums on existing contracts

²⁾ The reported actual outcome of contracts signed can be placed in relation to the operative assumptions that were made. Thus, the value of the deviations can be estimated. The most important components consist of extensions of contracts as well as cancellations. However, the actual income and administrative expenses are included in full in the operating result.

³⁾ Deferred acquisition costs are capitalised in the accounts and depreciated according to plan. The reported change in surplus values is therefore adjusted by the net result of the capitalisation and depreciation during the period.

⁴⁾ Assumed unit growth is 6 per cent, i.e. 1.5 per cent per quarter. Actual growth results in positive or negative financial effects.

⁵⁾ Estimated surplus value according to the above is not included in the statutory balance sheet. Capitalised acquisition costs (SEK 1,780m by 31 March 2003) are deducted from the surplus value closing balance.

Gamla and Nya Livförsäkringsaktiebolaget SEB Trygg Liv

Both Gamla and Nya Livförsäkringsaktiebolaget SEB Trygg Liv are operated according to mutual principles and are not consolidated with the SEB Trygg Liv Holding Group. This means that the group takes no risk with respect to changes in values in these investment portfolios.

Gamla Livförsäkringsaktiebolaget is closed for new business. Nya Livförsäkringsaktiebolaget was founded in 1997 and is open for new business.

In connection with the transformation of the mutual insurance company Trygg-Hansa Livförsäkring into a mutually operated limited liability company, subsequently called Gamla Livförsäkringsaktiebolaget SEB Trygg Liv, the Trygg Foundation was formed as a policyholder organisation to secure the policyholders' continued influence over the company.

The purpose of the Trygg Foundation is to promote healthy growth in the value of policies in Gamla Livförsäkringsaktiebolaget. The Trygg Foundation is entitled to

- appoint two Members of the Board of Gamla Livförsäkringsaktiebolaget and, jointly with SEB, to appoint the Chairman of the Board, which has five members
- appoint the majority of Members and the Chairman of the Finance Delegation, which is responsible for asset management within Gamla Livförsäkringsaktiebolaget.

Consolidation

After more than two years of a collective consolidation ratio below 100 per cent both Gamla och Nya Livförsäkringsaktiebolaget reached 101 per cent as of 31 March 2004. Hence, both companies have been within the target interval (100-115 per cent) during one quarter. However, the consolidation ratio target will not be regarded as fulfilled until this has been a fact during two consecutive quarters. The companies should have reached the target no later than 1 October 2004, to avoid being forced to reallocate.

As per 31 March 2004	Gamla Liv	Nya Liv

Appendix 3 Capital base for the SEB Financial Group of Undertakings

SEK m	March 2004	December 2003
Shareholders' equity in the balance sheet	51 450	48 464
./. Dividend decided by the Annual General Meeting	-2818	-2 818
./. Estimated dividend	-705 ¹⁾	
./. Deduction from the financial group of undertakings	-857 ²⁾	-1 205
= Shareholders' equity in the capital adequacy	47 070	44 441
Core capital contribution	5 632	1 815
Minority interest	1 780	1 630
./. Goodwill	-5 241 ³⁾	-5 246
./. Other intangible assets	-212	
./. Deferred tax assets	-1 625	
= Core capital (tier 1)	47 404	42 640
Dated subordinated debt	17 589	16 978
./. Deduction for remaining maturity	-2 098	-1 719
Perpetual subordinated debt	6 014	5 731
= Supplementary capital (tier 2)	21 505	20 990
./. Deductions for investments in insurance companies	-8 459 ⁴⁾	-8 459
./. Deductions for other investments outside the financial group of undertakings	-418	-422
= Capital base	60 032	54 749

Note:

The reduction of estimated dividend (1) is related to the first three months.

The deduction (2) from shareholders equity in the consolidated balance sheet consists mainly of nonrestricted equity in subsidiaries (insurance companies) that are not consolidated in the financial group of undertakings.

Goodwill in (3) includes only goodwill from acquisitions of companies in the financial group of undertakings, i.e. not insurance companies.

The minority interest and goodwill that is included in the capital base differ from the amounts stated in the balance sheet due to the inclusion of companies in the capital adequacy calculation that are not consolidated in the Group's balance sheet.

Goodwill from acquisitions of insurance companies (SEK 5,616m) is reflected in the deduction of investments in insurance companies from the capital base (4).

The parent company's core capital was SEK 40,102m on 31 March 2004 (35,964), giving a core capital ratio for the parent company of 19.1 per cent (18.0).

Appendix 4 Market risk

The Group's risk taking in trading operations is measured in a so-called Value at Risk model (VaR). During the first three months of 2004, VaR averaged SEK 76m. This means that the Group, on average with 99 per cent probability, could not

expect to lose more than this amount during a ten-day period. The following table shows the risk by risk type (SEK million).

	Min	Max	31 March 2004	Average 2004	Average 2003
Interest risk	55	100	81	73	113
Currency risk	8	62	16	24	21
Equity risk	2	48	13	13	11
Diversification			-28	-34	-30
Total	37	103	82	76	105

The average VaR has decreased during the first quarter of 2004, mainly due to a lower market volatility in interest rates.

Sensitivity analysis

An increase of market interest rates by one per cent as per 31 March 2004 would result in a reduction in the market value of all the Group's interest-bearing assets and liabilities, including derivatives, by SEK 2.7bn (2.8).
